Model of the new GSA building to be erected on the corner of Nashua and Causeway streets. The $78 million dollar building was designed by Cambridge architect Hugh Stubbins; configuration of the building is that of a five story base topped by a six story "L" shaped tower on the northwest corner. Building materials consist of horizontal bands of pink and gray granite alternated with glass windows. The building will contain 800,000 square feet of office space and is scheduled to open in 1986.
